Professional Summary

Full-Stack Software Engineer with nearly 2 years of experience building and scaling production web and mobile applications using React, Node.js, PostgreSQL, Flutter, AWS, and Spring Boot. Experienced in leading small engineering teams, owning architecture decisions, and delivering systems serving 100,000+ users during peak traffic events. Strong focus on backend systems, cloud infrastructure, performance optimization, and shipping production-ready products.

Skills

Languages: JavaScript, TypeScript

Frontend: React, Next.js, Tailwind CSS, ShadCN UI, Ant Design

Backend: Node.js, Express.js, REST APIs, Java, Spring Boot

Mobile: Flutter

Databases: PostgreSQL, MongoDB

Cloud & DevOps: AWS (S3, Cognito, EC2, Amplify), Google Cloud Platform, Docker, Linux (RHEL) **Tools:** Git, GitHub, Postman

Education

Master of Computer Applications (MCA)

Dr. D. Y. Patil Institute of Management and Research, Pune

2022 – 2024

CGPA: 7.86 (First Class with Distinction)

Experience

Software Engineer

Leadows Technologies Pvt Ltd | Sep 2024 – Present

- Led a team of 3–4 engineers, driving architecture decisions, sprint planning, code reviews, and project delivery.
- Designed and developed multiple full-stack applications using React, Node.js, PostgreSQL, and AWS.
- Built backend systems that successfully handle 100,000+ users during large-scale registration and event-driven traffic spikes.
- Architected scalable APIs, database models, deployment workflows, and cloud infrastructure for production applications.
- Deployed and maintained production applications using AWS services, Docker, Linux, and cloud-native architectures.
- Resolved a critical authentication token retry issue that significantly reduced unnecessary backend traffic and cloud infrastructure costs.
- Collaborated directly with clients and stakeholders to translate business requirements into production ready solutions.
- Delivered projects that contributed to acquiring additional client engagements for the company.
- Owned technical design discussions, task breakdown, code reviews, and production issue resolution across multiple projects.

Software Engineer Trainee

Leadows Technologies Pvt Ltd | Jul 2024 – Sep 2024

- Developed and shipped production-ready backend features within the first month of joining.
- Built and optimized API endpoints for performance-sensitive applications.
- Worked closely with senior engineers on application architecture and database design.

Projects

Biotech Analysis Platform (React | Node.js | AWS S3 | AWS Cognito)

- Built a platform supporting direct browser-to-S3 uploads for files exceeding 30GB.
- Designed direct-to-cloud upload architecture eliminating backend file transfer bottlenecks.
- Designed secure authentication and authorization workflows using AWS Cognito.
- Eliminated backend file relay architecture, reducing infrastructure costs, and improving upload performance.
- Supported large-scale scientific data processing workloads with stable production performance.

Biotech Community Platform (React | Node.js | PostgreSQL)

- Developed a LinkedIn-style community platform featuring content sharing, messaging, networking, and event management.
- Designed backend architecture, APIs, and database schemas for scalable growth.
- Successfully supported 100,000+ registrations during peak event periods without service disruption.
- Implemented performance optimizations across backend services and database queries.

Cricket Score App (Node.js | Flutter | PostgreSQL)

- Built a cricket scoring and tournament management platform similar to CricHeroes.
- Developed mobile and backend systems supporting live scoring, tournament management, team management, and player onboarding.
- Implemented password-less authentication using OTP, QR invitations, and magic links.
- Built live score broadcasting and offline scoring synchronization features.
- Designed backend system capable of handling concurrent traffic spikes during live tournaments and score broadcasts.

GetYouBot (Personal Project: Nodejs | NextJs | Postgres | Prisma)

- Built a SaaS platform enabling users to create AI-powered document-aware chatbots using uploaded knowledge bases.
- Implemented document ingestion, context retrieval, and conversational interfaces.
- Enabled users to create custom knowledge-based assistants with minimal setup.
