Professional Summary

Full-stack developer with ~2 years of experience designing and delivering scalable web applications. Led small teams to ship high-impact products, handling architecture, backend-heavy systems, and performance-critical workflows. Strong focus on efficiency, cost optimization, and real-world problem solving.

Skills

Languages: Java, JavaScript, TypeScript

Frontend: React, Next.js, Tailwind, ShadCN, Ant Design

Backend: Node.js, Express, Java, Spring Boot.

Databases: MongoDB, PostgreSQL

Cloud & DevOps: AWS (S3, Cognito, EC2, Amplify), GCP (App Run, Compute), Docker, Linux

Experience

Software Engineer | Leadows Technologies Pvt Ltd (Sep 2024 – Present)

- Managed a team of 3–4 engineers, owning project architecture, planning, and delivery.
- Designed and built multiple full-stack systems handling high traffic (lakhs of users during peak events).
- Delivered projects that directly contributed to acquiring new client engagements.
- Built scalable backend systems and optimized workflows for performance and cost efficiency.
- Resolved critical production issues including token retry loops, reducing unnecessary backend load and network costs.

Trainee | Leadows Technologies Pvt Ltd (Jul 2024 – Sep 2024)

- Contributed to API-heavy backend system and delivered production-ready features within one month.
- Worked on performance-sensitive endpoints and backend architecture.

Projects

Biotech Analysis Platform

- Built platform enabling direct 10GB+ file uploads from frontend to AWS S3, authentication using Cognito.
- Eliminated backend relay, significantly reducing infrastructure cost and improving upload speed.
- Handled GB-scale daily data traffic with stable performance.

Biotech Community Platform

- Developed LinkedIn-like platform with messaging, content sharing, and event management.
- Designed backend architecture using Node.js and PostgreSQL.
- Supported large-scale registrations (lakhs in short timeframes) without system failure.

GetYouBot (Personal Project) [Git](#) | [Live](#)

- Create and integrate AI bots within a few clicks that are context aware of your needs by documents uploaded by you. They answer those documents only.

Company ERP (Java, React, PostgreSQL)

- Company ERP is a white-label product that can be used to manage company resources and efficiently automate various tasks of various departments like HR, Finance, IT, etc.

Education

Master of Computer Applications (MCA), 2022–2024

Dr. D Y Patil Institute of Management and Research, Pune

CGPA: 7.6 (First Class with Distinction)

Achievements

- Maintainer for a device in an official Android custom ROM community project.
- Consistently led end-to-end delivery of multiple production systems.
